

Porci's Ocean Patrol Activity Sheet

MICROBEADS

Cloze Activity (level 1)

Using the words in the boxes, fill in the blank spaces to complete the sentences.

Microbeads

small sand harmful millimetre creatures

Microbeads are 'super s pieces of plastic' that are around one m in size or even smaller, no bigger than a grain of s. They can be hollow or solid, and come in a range of shapes.

Sadly, microbeads don't break down and they can litter our oceans forever. Sea c sometimes mistake microbeads for food. But they are not food!

They are h to our sea friends. If you eat fish, you could also be eating the microbeads.
