

Porci's Ocean Patrol Activity Sheet

Little Penguin - Comprehension Solutions (level 2)

1. Where can Little Penguins be found?

The Little Penguin can be found hanging out in all the Southern Australian and New Zealand waters.

Extra: You can see some of these little penguins on Granite Island off the coast of Victor Harbour.

2. How long do Little Penguins live for?

Little Penguins normally live for 6.5 years although they have been reported to live as long as 25 years!

3. Little Penguins are:

(b) Seabirds that do not fly

4. How many species of penguins are there in the world, and are the Little Penguins the largest or the smallest of them all?

There are 17 species of penguins in the world and the Little Penguin is the smallest of them all.

5. What are 2 challenges that the Little Penguin face?

Less fish for the Little Penguins to eat due to climate change and other marine predators wanting to make the Little Penguins their dinner.

6. What were some of the actions listed that we could do to help the Little Penguins?

Some of the actions that we can do to help the Little Penguins are:

- **always putting your rubbish in the bin**
- **keep your pets away from where they like to hang out**
- **if you see someone causing trouble for the Little Penguins, do not be shy and report it!**
- **keep the noise down near their nesting areas**
- **no flash photography or bright lights**
- **if in a boat, steer clear**
