

Sea Country - Boomerangs – Cloze Activity Solutions (Level 1)

In Karna language the boomerang is called a **Wadna**. They have rounded edges to help them **glide** through the air. This inspired the idea for modern **aeroplane** wings. There are different types of Boomerangs that are used for different reasons. Some are used for hunting **kangaroos** or emus, while others are used in battles or for **protection**. Boomerangs can also be used as a **musical** instrument where two are **tapped** together to create a rhythmic harmony.
