

KINDERGARTEN

BEFORE YOU VISIT THE MDC

Students will become science investigators during their time at the Marine Discovery Centre. To help them prepare for their visit, we encourage students to do some exploring and think about some questions:

Classroom discussion questions

1. What is the role of the Marine Discovery Centre?
2. What does it mean to look after our environment?
3. How can we care for our environment?
4. Do you know some marine creatures that are found in the ocean?
5. What sort of things do you find on the beach?

What to bring

1. Clipboards and pencils for students to record (optional: printed worksheets that have been provided by the MDC)
2. A crate or small students backpacks for recess, lunch and drink bottles
3. A rubbish bag as the MDC is a zero waste destination
4. Name tags for students and adults.

WHAT TO EXPECT AT THE MDC

At the Marine Discovery Centre, students will be given the opportunity to explore the environment of Henley Beach. Students will participate in a marine trail. They will learn and interact within the four rooms of the centre. Students will see live South Australian marine creatures in our aquariums. For the safety of our marine creatures we ask that while inside the centre, students are to walk and speak quietly.

Timetable for the day

9.45am	Welcome/Recess
10.30am	Explore at Henley Beach Marine Trail
12.00pm	Lunch - Students are welcome to explore our Nature Play playground
12.30pm	MDC activities in 4 separate groups
2.00pm	Depart

KINDERGARTEN

AFTER YOU VISIT THE MDC

Thank you for visiting the Marine Discovery Centre and we hope you enjoyed your time. When you return to your school, please continue to discuss the importance of the environment and the marine creatures.

Classroom discussion questions

1. What did you enjoy most about your time at the Marine Discovery Centre?
2. What was one new interesting fact that you discovered?
3. What things did you discover on the beach (your marine trail)?
4. What did you learn about looking after the environment?
5. What was one South Australian marine creature that you saw in the aquariums?
