

## Sea Creature Movements

Write a list of some different marine animals. These could be animals from the Marine Discovery Centre aquariums, or others from rock pools and the ocean. Write their names in the columns according to how it moves. Some of them may move in more than one way. Add your own movement in the last column.

Don't Move	Walk	Float	Swim	Slide	Crawl	

How does a marine creatures' movement affect their chance of survival in the ocean?
