

## Animal Expert

Become a marine expert by doing some research to find out more about a South Australian sea creature. Fill in the boxes below to discover more about your animal.

<b>Common name:</b>	
<b>Scientific name:</b>	
<b>Shape and features</b> Draw and label your animal. Sketch the body shape and add features on their body. Does your animal have legs, fins, shells, scales, spines or something else?	
<b>In the family</b> Other creatures that look similar to my animal are:	
<b>Body support</b> Does your animal have an internal skeleton, outer shell or soft body?	
<b>Movement</b> How does your animal move around the ocean, or does it stay still?	
<b>Food</b> What kind of food does your animal eat and how do they feed? Are they a carnivore, herbivore or omnivore?	

<p><b>Habitat</b> Describe and draw the environment that your animal lives in.</p>	
<p><b>Life cycle</b> How does your animal have its babies? Do they lay eggs or give birth to live young?</p>	
<p><b>Predators</b> List any natural predators of your animal. Do humans eat your animal too?</p>	
<p><b>Defence</b> What adaptations does your animal have to defend themselves from predators or danger?</p>	
<p><b>Living arrangements</b> Is your animal solitary or do they live in groups?</p>	
<p><b>Symbiosis</b> Symbiosis means living together. Does your animal have any special relationships with other creatures?</p>
